***Information Disclosure Statement***

1. The information disclosure statement filed 13 December 2004 signed by the Examiner in the office action dated 5/7/07 is attached with several Non-Patent Literature items lined through as not considered by the Examiner. Upon further review by the office, it is noted that several of the Non-Patent Literature references provided by the Applicant in the subject IDS fails to comply with the provisions of 37 CFR 1.97, 1.98 and MPEP § 609 because several of the cited Non-Patent Literature references contain no "date". Attached is a copy of the newly initialed and signed IDS dated 13 December 2004 with the Non-Patent Literature references lined through which do not have a proper date.

Examiner notes that these Non-Patent references cited by Applicant on the IDS dated 13 December 2004 which do not include a date have been placed in the application file, but the information referred to therein has not been considered as to the merits. Applicant is advised that the date of any re-submission of any item of information contained in this information disclosure statement or the submission of any missing element(s) will be the date of submission for purposes of determining compliance with the requirements based on the time of filing the statement, including all certification requirements for statements under 37 CFR 1.97(e). See MPEP § 609.05(a).

*Allowable Subject Matter*

2. Claims 1-25 and 29-34 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art neither anticipates nor renders obvious a label (independent claims 1, 11, 23 or 29) or method for producing a label (independent claim 30), specifically wherein the combination of limitations of each independent claim includes the limitation of the thermally conductive layer ensures that a detected difference in surface temperature corresponds with a difference in the emissivity values.

The closest prior art is as discussed in detail in the previous office actions.

Applicant's arguments were persuasive and the amendment to the independent claims overcome the prior art.

Therefore the prior art does not anticipate or render obvious the claimed inventions.

Furthermore, there is no prior art, either alone or in combination with the prior art that would render obvious the claimed invention, and no motivation found to modify the prior art to obtain the claimed inventions. Additionally, to modify the prior art to obtain the claimed inventions would require hindsight.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
